Experiment 1

AIM: Installation and Configuration of Flutter Environment.

- Visit [Choose your development platform to get started | Flutter](#)

- Select the preferred OS environment and system.

Use VS Code to install   Download and install

Download then install Flutter

To install Flutter, download the Flutter SDK bundle from its archive, move the bundle to where you want it stored, then extract the SDK.

1. Download the following installation bundle to get the latest stable release of the Flutter SDK.

   flutter_windows_3.16.9-stable.zip

   For other release channels, and older builds, check out the SDK archive.

   The Flutter SDK should download to the Windows default download directory: `%USERPROFILE%\Downloads`.

   If you changed the location of the Downloads directory, replace this path with that path. To find your Downloads directory location, check out this Microsoft Community post.

2. Create a folder where you can install Flutter.

   Consider creating a directory at `%USERPROFILE%` (`C:\Users\{username}`) or `%LOCALAPPDATA%` (`C:\Users\{username}\AppData\Local`).

- **Extract the ZIP File**

- Add the bin path to the environment variable

- Download the Android Studio

Darash Mishra D15B 39

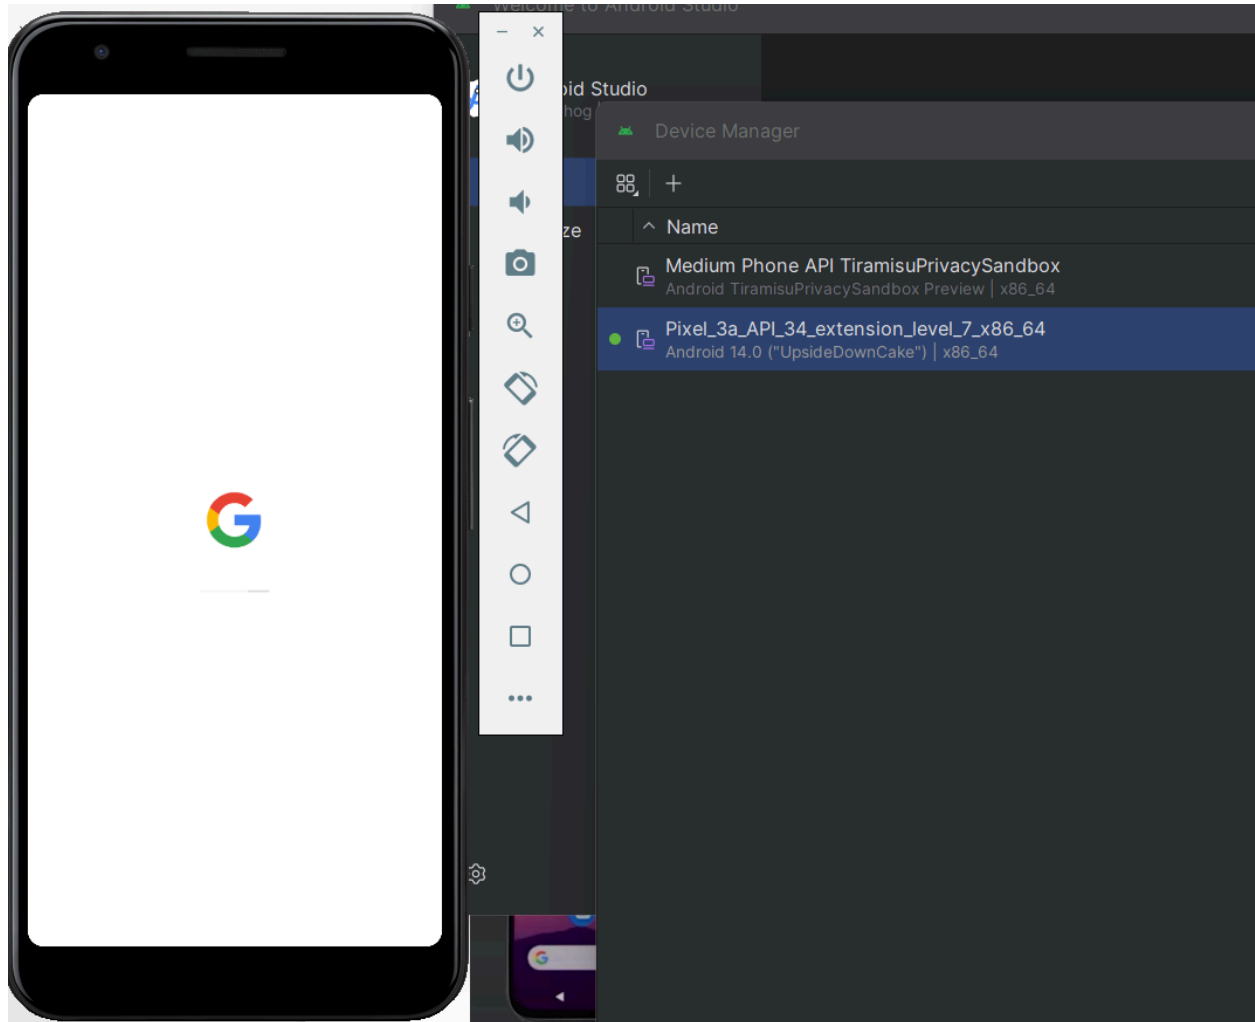

- -Install AVD (Android Virtual Device) from Android Studio Device Manager -> Add Device ->Select Model ->Select System Image - > Finish

Darash Mishra D15B 39

- Open command prompt on your machine and run command 'flutter doctor'
- Resolve Errors if any
- Install Dart and Flutter plugins in Android Studio Settings -> Plugins -> Search for Dart and Flutter

Conclusion: In this experiment , we installed Flutter SDK , Android Studio , Dart and Flutter Plugins . Also we accepted an Android Licence and Installed Android SDK and AVD using Android Studio
